

**2013-2014 CVO**  
**Tuning your Amp**

**Amp Tuning:** As you are facing the fairing with the outer off. Locate crossover switch and verify that it is on “High” or “HPF” . The crossover or “FREQ” dial to should be at approximately 180 Hertz (On the Focal amps that will be with the slot at 12 and 6). Turn main volume on GPS to its max setting. With music \* adjust gain(s) until the music is as loud as possible without distortion. You’re Tuned!

\* Music choice should be the from the cleanest possicle source (i.e. Ipod, CD etc.)

**Warning:** Distortion at a high level can blow your speakers. Due to the variations in music quality and recording levels you will have to pay close attention to the sound quality of your music. If you hear distortion through your speakers simply turn the radio down a notch or two.
